# Brampton's Talent Pipeline

## Sheridan

Faculty of Continuing and Professional Studies

Sheridan's College Innovation gateway connects entrepreneurs and change makers to innovation supports throughout Sheridan and provides direct access to the Centre for Intelligent Manufacturing (CIM) and the Entrepreneurship Discovery and Growth Engine (EDGE) Hub at Brampton Davis Campus. The Davis Campus in Brampton is Sheridan's largest campus with over 12,000 students.

Provides an intensive cybersecurity training and certification program designed to produce high quality cyber talent by providing students from diverse backgrounds the skills they need to launch careers in the cybersecurity sector. This not-for-profit organization is owned and operated by TMU University and provides training and certification, support for cyber scale-ups, applied R & D and more.

## Algoma UNIVERSITY

Algoma University, in partnership with Unity, launched the National Centre of Excellence (NCoE) to accelerate innovative new education, training and research opportunities. Through this partnership, new program offerings will be developed to cater to prospective students, in response to the rapidly expanding augmented and virtual reality landscape across global industries.

The Chang School of Continuing Education offers courses on Computer Security and Digital Forensics. Classes include Computer Network Security and Security Architecture and Design.
