

Brampton's Business Sustainability Dashboard Pilot

- The Brampton Business Sustainability Dashboard Pilot offers **a no-cost, 3-month opportunity** for local businesses to test a professional sustainability dashboard and advisory support funded by the City of Brampton.
- Participating businesses will work with Spectreco to **build a data-driven, 12-month action plan** focused on improving energy, water, and waste efficiency, supported by clear tracking of results over time.
- The Pilot is designed to **identify potential operating cost reductions**, particularly through low- and no-cost efficiency measures, and to help businesses prioritize future high-ROI upgrades; specific savings will depend on each facility's baseline and actions taken.
- Businesses gain access to **enterprise-grade technology and expert guidance** typically used by larger organizations, with hands-on support to interpret results and inform decision-making.
- Participants will receive a **Digital Brampton Sustainability Badge** recognizing their commitment to climate action, which they can use in their marketing and ESG communications.

Limited spaces available

WHY THIS PILOT WORKS

No cost, no risk — fully funded by the City of Brampton
Not just a report — hands-on support through technology
